

CODEZEN

Branding guide

ABOUT US

Codezen is a cybersecurity firm specializing in blockchain and Web3 technologies. We provide tailored security solutions designed to meet the distinct challenges of decentralized systems.

MISSION

Protect the future of decentralized finance, applications, and networks through thorough audits and expert consulting services.

With deep expertise in blockchain, smart contract auditing, and Web3 security, Codezen offers an unparalleled understanding of decentralized technologies. Our comprehensive knowledge empowers clients to confidently navigate the rapidly changing landscape, ensuring their systems are fortified against emerging threats and vulnerabilities.

Monochrome

LOGO DO'S

Use the Official Logo Files: Always use the logo files provided by the brand, ensuring high quality and resolution.

Maintain Clear Space: Keep the designated clear space around the logo free from text and other graphics to enhance visibility.

Follow Color Guidelines: Use the appropriate color version of the logo for different backgrounds, adhering to the brand color palette.

Maintain Proportions: Resize the logo proportionately to avoid distortion. Use the corner handles when scaling.

Positioning: Position the logo prominently, ensuring it is easily visible and recognizable on all materials.

Use Appropriate Backgrounds: Place the logo on solid, contrasting backgrounds to enhance visibility and impact.

Include in Marketing Materials: Incorporate the logo consistently across all marketing materials, including print and digital platforms.

Use in Signatures: Include the logo in email signatures and other official correspondence to reinforce brand identity.

SECURE AREA

It should always be used in its original form.

Isologo

Maintain a clear space around the logo to ensure visibility and impact. This space should be equal to the height and width of the "C".

Use monochrome versions over a image or pattern.

Logo over solid color background

LOGO DONT'S

Fonts

“FELIX TITLING”, is exclusive for logo use. It must not be used for texts.

For body text, we use the secondary font, “OUTFIT”, which should be set in Regular, Semibold or Bold styles, typically at 12 pt for legibility.

When designing for digital platforms, utilize the primary web font OUTFIT with fallback options like Arial to ensure compatibility.

Maintain color consistency with our defined font colors, including primary and secondary color codes.

Proper spacing is crucial; use a line height of 1.5 times the font size and appropriate letter spacing for clarity. Please avoid substituting fonts without approval and refer to visual examples in our branding materials for guidance.

COLOR PALETTE

When applying colors, ensure proper contrast for accessibility, especially in digital formats.

Consistent usage of these colors across all platforms -print, web, and social media- will strengthen brand recognition.

Avoid using unapproved colors or variations that deviate from this guide, and refer to provided examples for effective application.
